

**BIOVICO** | MEDICAL ESTHETICS

FLAVYA<sup>TM</sup>

# FLAVYA™

## Post Treatment Products

Flavya™ Post-Treatment Products are biocellulose-based medical devices infused with hyaluronic acid. Due to their occlusive properties, they form a protective barrier on the skin, which is particularly beneficial after specific medical esthetic treatments. Additionally, their cooling effect helps soothe irritation and reduce swelling.

**SOOTHES IRRITATIONS**

**SUITABLE FOR ALL SKIN TYPES**

**PROVIDES A COOLING EFFECT**

**PROVIDES A PROTECTIVE BARRIER AFTER ESTHETIC MEDICINE PROCEDURES**

Flavya™ Post Treatment Products are complementary medical devices class I dedicated to be used after selected medical esthetic treatments.
